Advanced Manufacturing Companies **THRIVE** in Northeast Ohio

Brought to you by Team NEO
The Climate Is Right for Increasing Innovation and Productivity

With a $236 billion economy, the 18-county Northeast Ohio region, known as Cleveland Plus, is globally recognized for its powerful history of innovation and traditional manufacturing. Over the years, we’ve built on that tradition to become a globally respected center of advanced manufacturing.

Cleveland Plus has all the assets you need to develop, produce, and deliver products and services. A diverse talent pool of nearly 2 million workers, a deep and diverse supply chain, exceptional market access and our rich manufacturing legacy help make your innovations more profitable.

Many of today’s industry leaders — Parker Hannifin, Eaton, Timken, Lincoln Electric Holdings Inc. and Arconic, to name just a few — choose to run operations in Northeast Ohio because they value our region’s capacity for innovation, technology adaptation and productivity.

Technology Clusters and Organizations Support Your Success

Team NEO helps bring innovation to life with cluster groups that leverage our region’s unique assets and strengths. Focused on three areas — smart devices and systems (Internet of Things, or IoT), energy storage and additive manufacturing — these clusters connect companies, and academic and research institutions, with opportunities to collaborate around new technologies that build on the region’s industrial, organizational and workforce strengths.

Numerous organizations and institutions, including the following, fuel Northeast Ohio’s expertise and growth:

- NASA Glenn Research Center performs research and development to advance aviation, enable exploration of the universe and improve life on Earth. Its scientists and engineers deliver advanced flight systems for spacecraft and improve efficiency and safety in aircraft, often in partnership with U.S. companies, universities and other government institutions. The center’s core capabilities are air-breathing and in-space propulsion, power systems, communications, materials, biomedical technologies and advanced physical science space experiments.

- America Makes is the nation’s leading collaborative partner in additive manufacturing (AM) and 3D printing (3DP) technology, research, discovery, creation and innovation. As a public-private partnership with member organizations, academia, government, nongovernment agencies, and workforce and economic development resources, America Makes works to increase our nation’s global manufacturing competitiveness.

- JumpStart is a nonprofit venture development organization that works with diverse and ambitious entrepreneurs to help them unlock their full potential and transform communities. The organization is part of a deeply connected network of public, private and nonprofit entities throughout Northeast Ohio that focus on providing support to entrepreneurs and fostering environments to facilitate their growth.

- BioEnterprise provides management counsel and support services to health IT, medical device and biopharmaceutical companies.
The Cleveland Plus region is centrally located between New York City, Chicago and Toronto, allowing quick market access to more than half of North America, including Canada. Nearly 50% of the U.S. population is within 500 miles/805 km of the Northeast Ohio region. Businesses located here enjoy faster shipping times, reduced costs and greater proximity to OEMs, plus connectivity to a deep and diverse supply chain.

The region also provides access to global markets through the Cleveland-Europe Express, the only vessel service that moves containerized and non-containerized cargo between the Great Lakes and Europe, through the Port of Antwerp, with multiple connections.
About Team NEO and the Cleveland Plus 18-county Region

Team NEO is a business development organization focused on creating jobs for Northeast Ohio’s residents. In collaboration with our partners, it leads the region’s business attraction efforts, supports business retention and expansion work as Northeast Ohio’s JobsOhio affiliate, accelerates the impact of innovation in the region, and aligns strategies and resources within the economic development network to maximize its impact. In addition, Team NEO provides tools to assist employers in attracting talent to the region.

Team NEO is part of the robust Northeast Ohio economic development network, providing business decision-makers with access to customized solutions that accelerate growth, foster innovation and mitigate risk through a connected and collaborative ecosystem.
